

AL425 2-AXIS

PREMIUM INSIDE LIFT

PREMIUM 2-AXIS INSIDE LIFT

From a pleasing aesthetic to a highly adaptable design, the AL425 sets the standard for inside lifts. Fully powered lifting and rotation, coupled with a choice of docking device (*not included*) for your chair, the AL425 is one of the easiest lifts to use in the industry.

It is the ideal solution to stow a power chair or scooter inside a van, truck or SUV.

- Only 30" (76.2 cm) of headroom required
- Offset post allows the mobility device to be safely unloaded on the side of the vehicle
- Can be installed on either the passenger or driver side for maximum convenience
- Weather-resistant hand control (wireless key fob option available)
- Universal base adapter included

PENDANT CONTROLLER

- Easy-to-grip base with soft, non-slip rubber coating
- Backlit buttons for night use
- Built-in LED flash light to assist with visibility while loading
- On-Off button with shut-off timer to prevent unintended activation
- Magnetic backing for convenient stowage — elevated from water in trucks
- Attractive, modern aesthetics

I have used my Harmar 2-axis hoist lift for several years with virtually no problems. It's so easy to use. I can't remember all the folks who have seen the lift and wanted to know more about it. My Harmar Axis II gives me the mobility I want.
